NAVMAN FLEET TRACKING

At the heart of the Navman fleet tracking solution is the advanced tracking software AVL2. This robust software solution offers more than 50 reports, 4 map views, live traffic, dynamic dashboard, plus much more. Using the Award Winning Navman system works for all fleets from a few vehicles to over five hundred.

FULL SUITE OF SOLUTIONS

Navman offers a full spectrum of tracking solutions from vehicles to construction equipment, stationary assets, and trailers.

COMMUNICATION

Being able to not only see the location of fleet vehicles, Navman offers state of the art text messaging to keep in contact, give directions and even send forms thru the M-Nav 800. This offers both mapping, and text message screen in one unit.
